

Senior Solution & Integration Architect

Together we make the difference

Butos AG is the distribution and integration partner of TIBCO in Switzerland located in Wettingen. We focus on the integration of the world leading Master Data Management solution EBX (Gartner Magic Quadrant). Data management is becoming increasingly important because of digitization and cost savings. Digital transformation, data management and compliance are major topics in today's market. On top of TIBCO EBX we provide the Smart Product Suite covering business solutions uniquely in the world and established at large customers.

Job Context

- Solution and integration architecture for Smart Product Suite in context of TIBCO EBX
- Opportunity to manage our Professional Service team for Smart integration projects
- Located in 5430 Wettingen / Switzerland

Mission & Objectives

Digitization is a big challenge for many companies and will change processes immensely in the coming years. As a solution and integration architect you are responsible for understanding our client's landscape and our product family in detail. Your creativity is needed to setup straight forward processes for product integration and coordination of our Swiss Professional Service team in projects with new and existing customers. You will be accountable for supporting the project team in the analysis of customer requirements, for defining and documenting the customer specific solution and integration, design, and configuration of EBX software in order to meet the agreed customer requirements.

Key Activities

- Represent Butos in a consultancy role in Professional Service & integration projects
- Design integration and solution architecture and approach with the client depending on the customer landscape
- Coordinate with the business analysts, concept designer and the application integration and development team
- Technical consultancy of the Smart Product Suite and EBX solution
- Configure EBX in line with the documented solution design
- Provide written documentation of the solution and integration architecture
- Analyze customer data needs and propose appropriate EBX configuration solutions
- Support in problem analysis and resolution activities

Skills required

- Technical bachelor or master's degree
- Experienced in data management as solution and integration architect as consultant
- Experienced in all terms of integration web technologies (REST, SOAP) and ETL
- Experienced in messaging technologies like ESB, JMS, Kafka
- Good understanding and coding ability of Java
- Good communication, analysis, documentation, and customer service skills
- Ability to learn on the fly and make quick decisions and recommendations
- Reflect on learnings and provide compelling solutions for improvement
- Fluent communication and writing skills in German and English

What Butos offers you

- Working in a flexible start-up environment
- Working in an area which accelerates due to the digitalization trend
- Working with products which are ranked in Gartner as leader
- Opportunity to design state-of-the art solutions and set trends
- Opportunity to get market leader with Smart business solutions with us
- Expert education in leading TIBCO and Smart Suite products
- Learning the management of our solution and Professional Service team
- Integration in the Butos team for discussion, support, and socializing
- Get to learn and understand different business and technical areas
- Good social coverage
